PROFESSIONAL SUMMARY

IT and Systems professional combining hands-on infrastructure experience - Windows Server, Active Directory, VMware, and Microsoft 365/Azure administration, including Microsoft Intune, Entra ID, device management, and endpoint security - with a growing specialization in applied AI and automation, including Retrieval-Augmented Generation (RAG), intelligent agents (LangChain, LangGraph), and workflow automation (n8n). Background in 24/7 mission-critical operations under strict SOP/SLA and ITIL-aligned frameworks, with proven adaptability across rotating shifts and sustained composure in high-pressure environments. Currently completing a Bachelor's Degree in Systems Engineering.

SKILLS

Operations & Frameworks: Tier 1/2 Technical Support, Incident Management & Documentation, ITIL-Aligned Processes, SOP/SLA Compliance, 24/7 Shift Operations, Root Cause Troubleshooting

Server & OS Administration: Windows Server 2022, Windows Desktop, Linux Fundamentals

Core Infrastructure: Active Directory (OUs, GPOs, User Management), DNS, DHCP, Networking (CCNA)

Virtualization & Cloud: VMware Workstation/ESXi, Hyper-V, Microsoft Azure Fundamentals (AZ-900 in progress), Google Cloud Foundations

AI & Workflows: RAG (Retrieval-Augmented Generation), LangChain, Agentic AI Architecture, n8n Automation, REST API Integrations

Productivity & Scripting: Microsoft 365, Microsoft Intune, Microsoft Entra ID, Python, C#, Dynamics 365 Finance & Operations Fundamentals, Power Platform & Dataverse Fundamentals

PROFESSIONAL EXPERIENCE

Intel Corporation, Costa Rica (2023 - 2025)

Technician Operator

- Operated TSX-certified die-attach equipment for server chipset production under strict thermal, vacuum, and gas (oxygen/nitrogen) parameters, safeguarding product quality on every run.
- Monitored bonding parameters through Intel's proprietary process-control software, proactively reading logs and graphs to prevent failures or production loss.
- Diagnosed and resolved equipment errors (vacuum/suction failures, substrate positioning) within SLA-defined time windows, escalating complex cases to keep line running.
- Owned shift passdowns, machine setups, calibrations, and X-ray verification across a 24/7 production environment.
- Sustained performance and attention to detail through 4x3 rotating night shifts in a high-pressure shared work-cell with operators, technicians, and engineers.

PROJECTS AND HOME LABS

Windows Server 2022 Home Lab (VMware Infrastructure)

- Designed and deployed virtualized enterprise lab in VMware Workstation Pro with Domain Controller & Client Workstation.
- Configured Active Directory Domain Services (AD DS), OUs, user accounts, and Group Policy Objects (GPOs) for centralized administration.

HR Process Automation Assistant (Oracle Next Education - ONE)

- Built automation assistant using n8n workflow automation and RAG pipeline with Cohere embeddings, PostgreSQL (Neon), and Telegram API.

Alura Agente Inteligente (Challenge Alura Latam - Oracle Next Education)

- Built RAG Q&A agent (LangChain, FAISS vector store) for document querying with exact source citations. Containerized with Docker on OCI Compute.

EDUCATION & CERTIFICATIONS

Fidélitas University: Bachelor's Degree in Systems Engineering (Expected 2029) | Web Development Technician (Completed)

SC-300: Identity and Access Administrator (Completed)

MD-102: Endpoint Administrator (Completed)

Cisco CCNA (Completed)
